

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER
Monitoring Reporting Requirements Not Met for
Clinton Water Association-Route 119 WV3303107

Our water system violated drinking water monitoring requirements. Even though these were not emergencies, you, as our customers, have a right to know what happened and what we did to correct the situation.

We are required to monitor your drinking water on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During periods listed in the table below, we did not monitor or test as required and therefore cannot be sure of the quality of our drinking water during that time.

What should I do?

At this time, there is nothing you need to do.

The table below lists the monitoring we did not conduct, other violations, and the associated compliance period.

Monitoring Violation	Year-Fed Report #	Monitoring Frequency	Compliance Period
WB, CHLORINE, MOR Incomplete/Not submitted as Required or Missing Res. CI from Coliform Result	2019-219808	Monthly	SEP 2019

What happened? What is being done? (Describe corrective action)

These are old violations that we thought had been cleared up but due to paper work not being filled out properly these are still showing as outstanding. We are resending these back out to make sure all paper work is done correctly this time and all violations cleaned up.
